

Welcome to the final year in a three year series of STEAM ahead!

Each all new session will have three 2.5 hour classes (see schedule for dates), with a 30 minute orientation on the first class of each session beginning at 12:30pm. Classes will be held on Tuesdays from 1pm-3:30pm. The three classes will cover a common topic and build on each other, so it is important to attend all sessions, if possible. In general, each class will cover the equivalent of a typical week's worth of science lessons. If your student attends all 5 sessions it will cover the equivalent of a semester's worth of science lessons!

Parents are welcomed and encouraged to stay and learn with their student(s).

Each week, students will have an assignment to complete at home. Please help your student with their assignment. This provides a great opportunity to discuss the week's activities with your child. Some of the assignments are follow-ups to the day's activities, and some are preparation for the next week's class.

The cost per session (3 classes) is \$149. If you register for all 5 sessions, you will receive ½ off session 5! Registration forms are available online at www.akchallenger.org.

If you have questions about any of the activities, content or GLE's being covered, please contact Kathy East.
